DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on 05/02/06 has been entered.

Remark

2. Claims 1, 16-17, and 23-24 were canceled, and claim 29 was previously added. Pending claims are claims 2-15, 18-22, and 25-29 for reconsideration.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on 05/02/06 was filed on or after the mailing date of the RCE on 05/02/06. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Allowable Subject Matter

4. Claims 2-15, 18-22, and 25-29 have been allowed.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:

The closest prior art of record issued to Rakib and Frodigh et al (IDS submitted) fails to either alone or combine to other prior arts to teach or suggest a computing device and its corresponding methods including the step of receiving a broadband signal at a receiver by the use of a first modulation technique; tuning the receiver to a channel within the broadcast signal; modifying one or more operational parameters to demodulate the channel by the use of a second modulation technique to determine whether the channel is a data channel by further adjusting a demodulator associated with the first modulation technique to demodulate the received channel in accordance with a second modulation technique; sweeping a carrier frequency through a loop bandwidth of the channel to until carrier frequency lock is achieved; and determining that the channel is an active data channel if carrier frequency lock is achieved" as cited in claim 3 and similarly in claims 10, 15, and 22. Although Frodigh teaches to have method for demodulating information in a communication system that supports multiple modulation scheme, yet Frodigh is silent on the step of "sweeping a carrier frequency through a loop bandwidth of the channel to until carrier frequency lock is achieved, and determining that the channel is an active data channel if carrier frequency lock is achieved" therein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
